

Z8t

LED Video Controller

Specification v2.0

Overview

Z8t is a professional LED display controller for high-end applications offering real-time scaling, ultra-low latency, HDR, multi-window display and deep color formats, featuring excellent image quality, precision color reproduction and powerful video processing. Z8t supports a loading capacity of up to 17.69 million pixels, with a maximum width up to 16384 pixels. Equipped with 5G Ethernet ports and 10G optical fiber outputs, Z8t can reduce dramatically the cable quantity and simplify hardware connection on site. It meets the on-site configuration requirements for ultra-long, ultra-high and ultra-large screens.

With swappable card design, Z8t allows for various hardware configuration according to actual field requirements.
